

# Special Focus Sessions

These sessions do not require advance registration or tickets.

**Monday, 4:30 PM – 6:00 PM**

**Imaging Algorithms in Pulmonary Embolism: So Many Tests, So Little Time**

Moderated by Ella A. Kazerooni, MD, and Joel E. Fishman, MD, PhD

**Implementations of Pay for Performance: Implications for Radiology**

Moderated by Howard P. Forman, MD

**Image Overload: Dealing with It**

Moderated by David E. Avrin, MD, PhD

**Molecular Imaging: Making It Useful and Usable**

Moderated by John M. Hoffman, MD

**Peripheral Nerve Imaging at the Crossroads of Musculoskeletal Imaging and Neuroimaging**

Moderated by David A. Rubin, MD

**Practical Realities of Functional MR Imaging: Ready for Prime Time?**

Moderated by Aaron S. Field, MD, PhD, and John L. Ulmer, MD

**Imaging the Fetal Brain and Spine: Why, When, and How?**

Moderated by A. James Barkovich, MD

**Photon Counting: Is It the Future of X-ray Imaging from Mammography to CT?**

Moderated by Mats Danielsson, PhD, and Robert M. Nishikawa, PhD

**Nonoperative Treatment of Liver Tumors: What Are the Best Options?**

Moderated by Erik K. Paulson, MD

**The New Reality of Combat Injuries, with Emphasis on Central Nervous System Trauma**

Moderated by Diego B. Nunez, Jr, MD, MPH

**Musculoskeletal US: Has the Time Come?**

Moderated by Jon A. Jacobson, MD, and Marnix T. van Holsbeeck, MD

**Wednesday, 4:30 PM – 6:00 PM**

**Advances in Breast Imaging: Impact of PET, MR Imaging, and CT**

Moderated by Jennifer A. Harvey, MD

**Functional Lung Imaging: What Does It Offer?**

Moderated by Warren B. Geftter, MD, and H. Page McAdams, MD

**Controversies in Emergency Radiology: Point/Counterpoint**

Moderated by Stuart E. Mirvis, MD, and Luis Rivas, MD

**Neck Nodes: Cutoff Criteria and Controversies**

Moderated by Hugh D. Curtin, MD

**Choosing the Right Radiology Job: What You Need to Know**

Moderated by Lawrence R. Muroff, MD, and Carolyn C. Meltzer, MD

**Controversies in Musculoskeletal Radiology: Point/Counterpoint**

Moderated by Mark J. Kransdorf, MD, and Donald L. Resnick, MD

**PET/CT: Who Should Read It?**

Moderated by Milton J. Guiberteau, MD, and Michael P. Federle, MD

**Controversies in Pediatric Radiology: Get Ready to Rrrrrumble!**

Moderated by Donald P. Frush, MD, and Lane F. Donnelly, MD

**Endocrine Related Neoplasms: A Radiologic-Pathologic Review**

(In Conjunction with the Armed Forces Institute of Pathology)

Moderated by William D. Craig, MD

**Quantitative Structured Reporting in Cancer Imaging? Get Ready: It Is Coming**

Moderated by Daniel C. Sullivan, MD

**Informatics for the Future of Radiology**

Moderated by G. Scott Gazelle, MD, PhD, and Kimberly E. Applegate, MD, MS

**Thursday, 3:00 PM – 4:00 PM**

**Covering the Emergency Department: 24/7**

Moderated by Stephen R. Baker, MD

**Rationing of Imaging Services: Facing the Inevitable Crisis in Resources—U.S. versus Canadian Perspective**

Moderated by G. Scott Gazelle, MD, PhD, and Walter Kucharczyk, MD

**Managing the Risk of Radiation from CT**

Moderated by James A. Brink, MD

**ACR Update on Critical Issues Facing Our Profession**

Moderated by James H. Thrall, MD

**How to Structure and Manage an Effective PACS Program in 2008**

Moderated by Edward I. Bluth, MD

**How Should Physics Be Taught to Radiology Residents?**

Moderated by Kimberly E. Applegate, MD, MS, and William R. Hendee, PhD

## Featured at RSNA 2008

• **New:**

– Half-day Series Courses in Breast, Chest, Genitourinary, Gastrointestinal and GI/Emergency

– Applied Science Presentations

• Self-assessment modules (SAMs)  in a variety of subspecialty areas

• Categorical Course in Diagnostic Radiology: Cardiac

• Categorical Course in Diagnostic Radiology Physics: CT and MR Imaging
